

Optical fiber transmission, infinite vision

i_Magnate 1.5T super-conductive MRI system

- Optical fiber transmission
- Cloud service
Cloud diagnosis
- 0 helium boil-off
- Comfort patient space
- Scan and diagnosis on mobile device
- Remote system maintenance

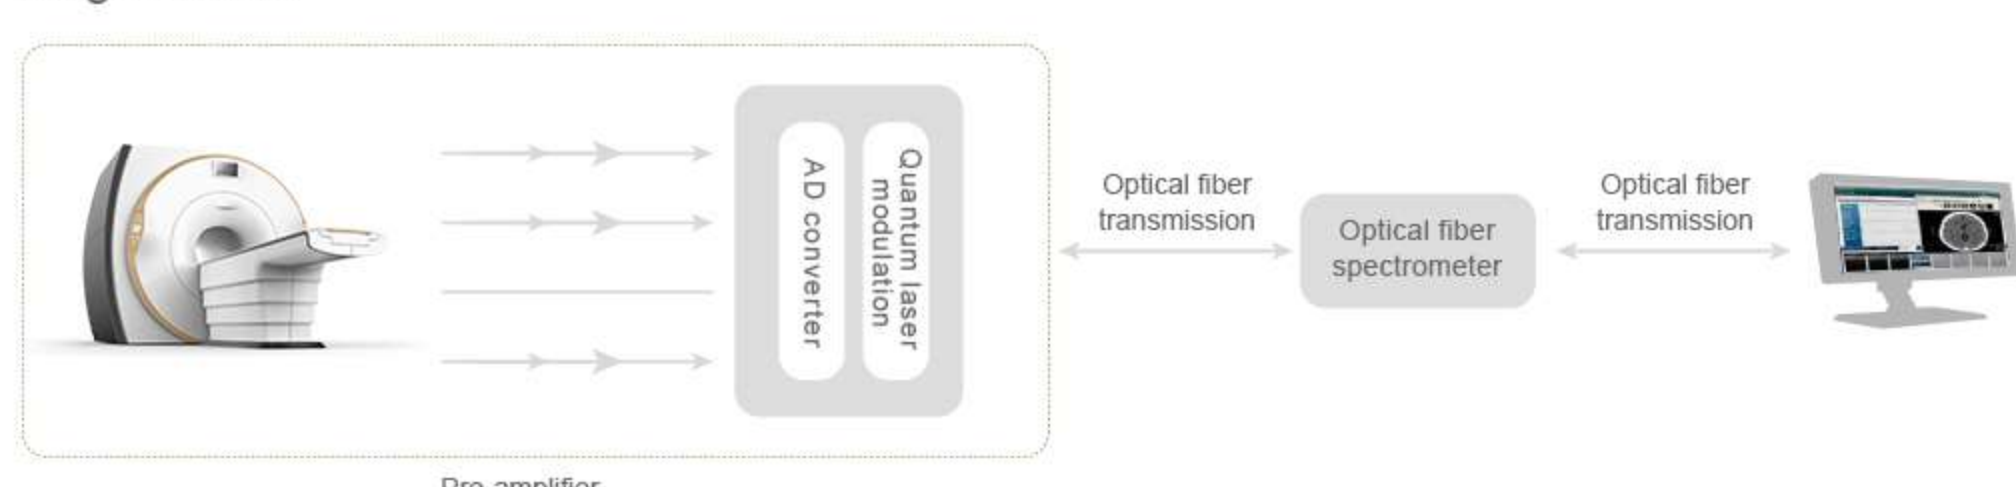

Optical fiber transmission, precision imaging

- Accurate**
Optical fiber transmission technology
Wide dynamic range, higher SNR
- Rapid**
Parallel acquisition technology
Faster scanning speed

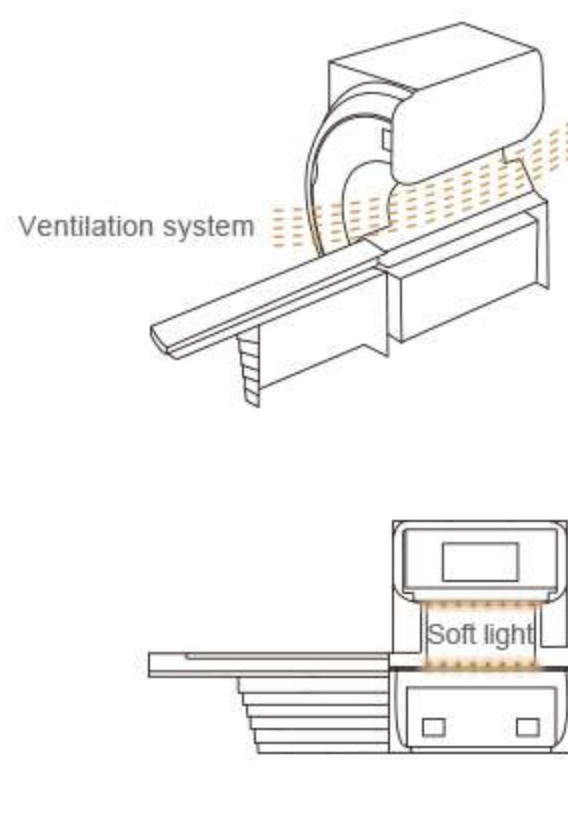

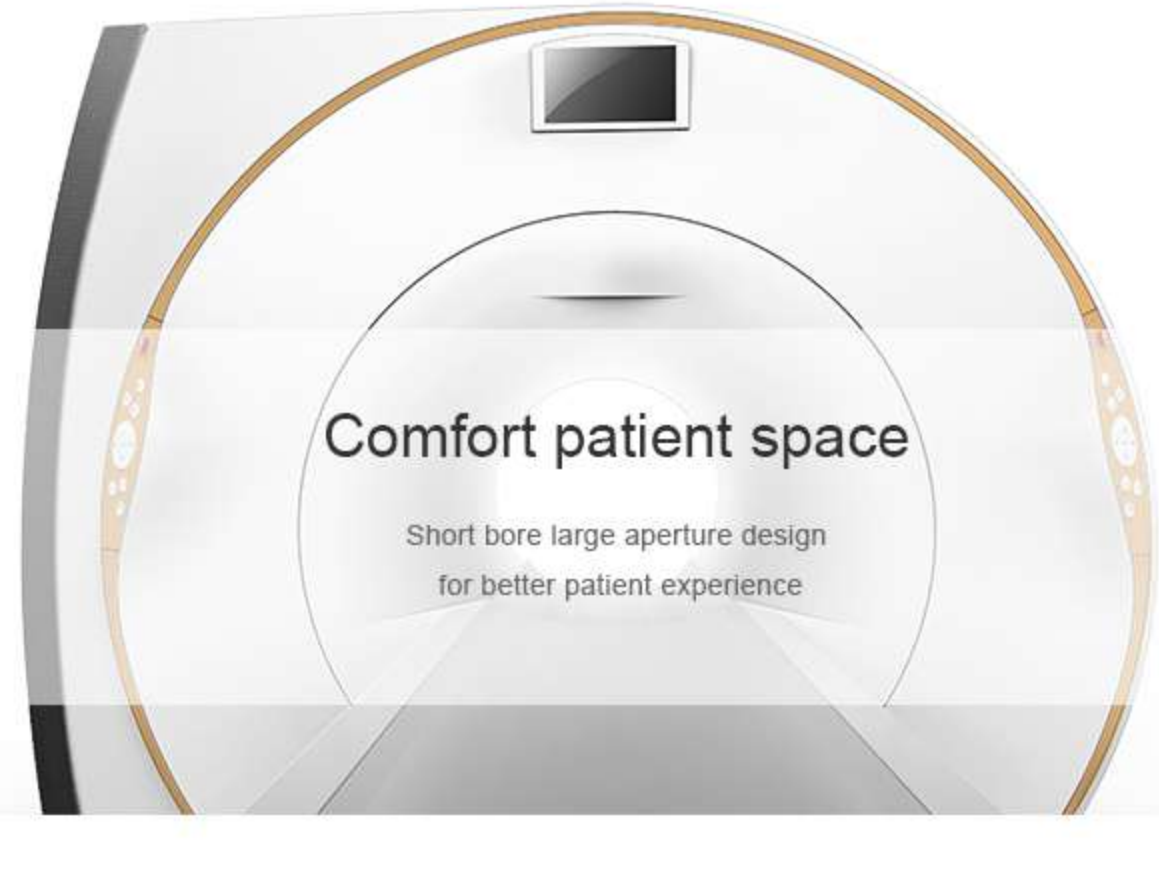

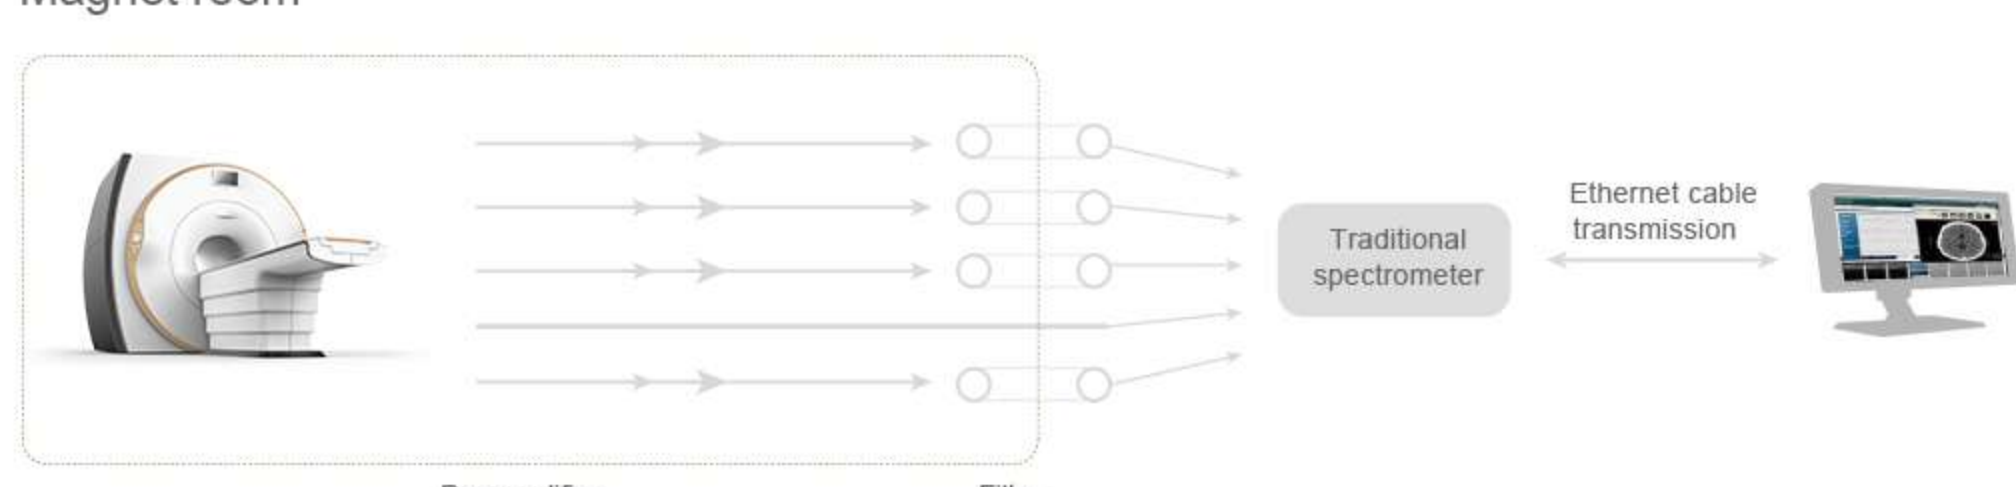

Optical fiber spectrometer, faster & low signal loss

Magnet room

Magnet room

Pad mobile device control

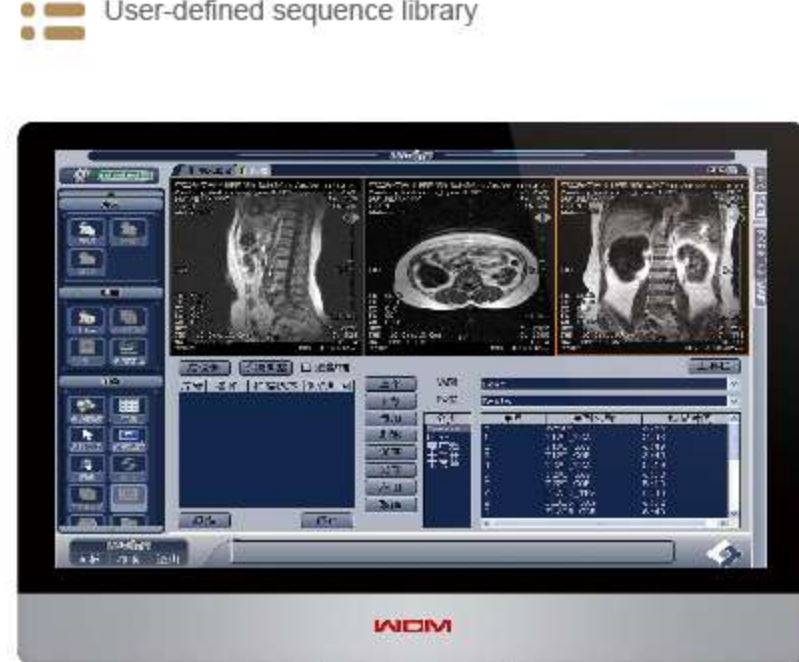

Patient accompanying scan

- Image review everywhere
- Auto sending to PACS after scanning
- Remote image review through internet

Intelligent imaging platform

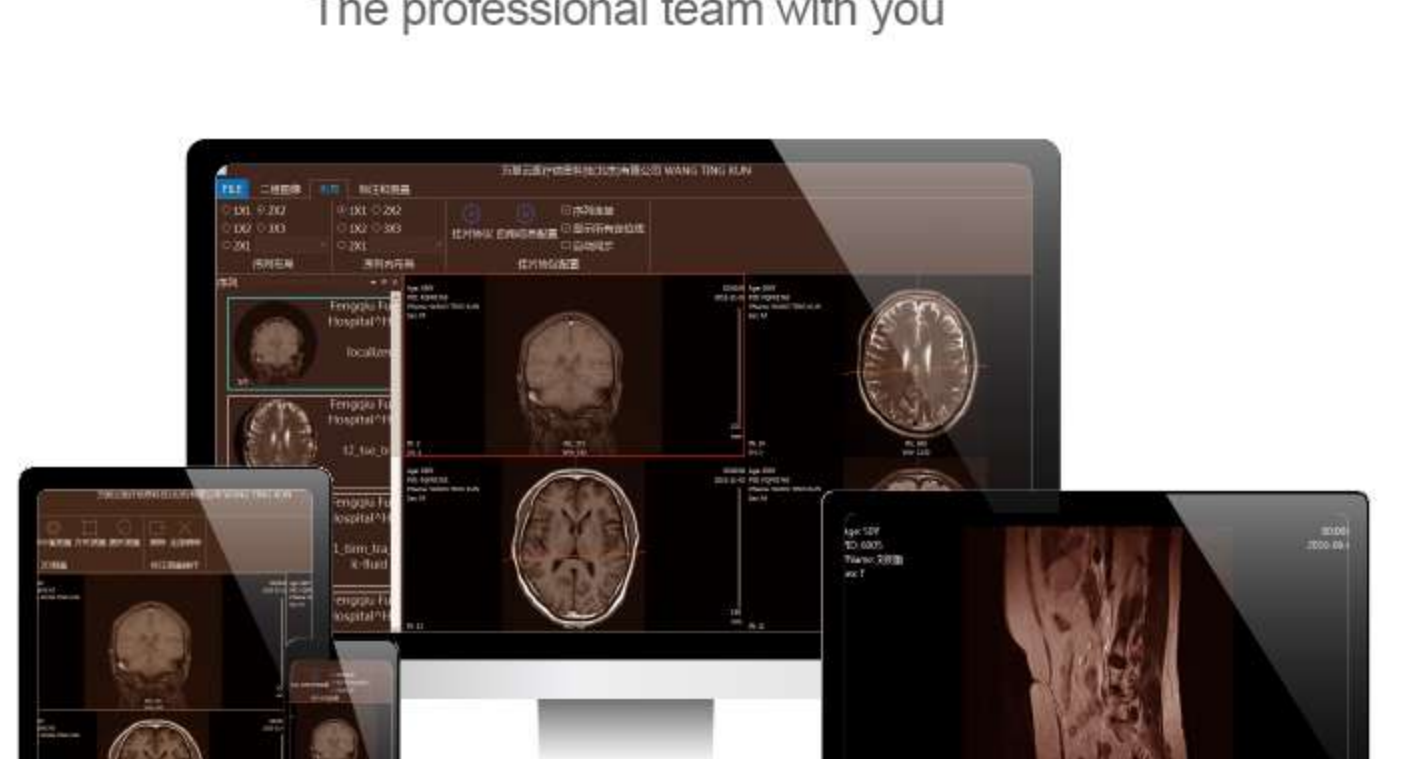

Dual screen, graphic reporting

- 9 slices scout image
- Navigation image
- Multi-language support
- Multi-task management
- Smart arrangement
- 4-corner shortcuts
- User-defined sequence library

Cloud diagnosis service

The professional team with you

- Remote maintenance
- Remote diagnostic and reporting service
- Remote real-time monitoring of system status

Combined design of ergonomics and art elements
